WORK EXPERIENCE

Jan 2023 - present
CRH Ph/Sence1 Inc | Philippines
Web Developer

- Leads project management, quality assurance, and development efforts for a Laravel, React, and TypeScript project. The initiative is geared towards assisting students and scholarship providers in posting and managing scholarship opportunities and applications.
- Spearheads the project management, quality assurance, and development efforts for a cutting-edge initiative utilizing Ruby on Rails, React, and TypeScript. The project's primary objective was to facilitate seamless connections between homeowners and short-term workers.
- Implemented feature enhancements and resolved bugs for a client project utilizing Ruby on Rails and React technologies.

Mar 2021 - Dec 2021 and May 2022 - May 2023
Yosemitelabs | USA
QA Engineer

- Developed test cases and test scenarios based on software specifications and user requirements to ensure full coverage of functional and non-functional aspects.
- Executed test cases, record test results, and identify and document defects or issues found during testing. Performed regression testing after code changes to ensure that new updates do not introduce new defects or negatively impact existing functionality.

WORK EXPERIENCE

Mar 2022 – Nov 2022
Akaru PH | Philippines
Backend Engineer
- Developed backend for the Manabie web application. This project involves gRPC, microservices, NATS, and kafka.
