

ROAN DAYNE DINO

Web Developer · Project Manager · QA Engineer

Tagaytay City, Philippines | +63 917 148 9734 | roandaynedenarys@gmail.com | roandino.dev

PROFILE

Software developer with 7+ years of experience spanning Golang, Ruby on Rails, Laravel/PHP, React, React Native, Vue.js, and TypeScript. Comfortable operating across the full delivery cycle — development, QA, and Agile project management — and has shipped production systems in construction technology, fintech, blockchain, education, and e-commerce.

SKILLS

Languages & Frameworks	Golang, Ruby on Rails, Laravel/PHP, React, React Native, Vue.js, TypeScript
Systems & Infrastructure	gRPC, Microservices, NATS, Kafka, REST APIs
Practices	Agile/Scrum project management, QA & test case design, code review, blockchain integrations
Languages	English, Tagalog

WORK EXPERIENCE

Web Developer Strategic Planning Co. — New Zealand (remote)	Aug 2025 — present
- Develops and maintains StratApps, a construction-intelligence SaaS suite used by contractors across New Zealand, Australia, and other markets — including bill-of-quantities generation (iBOQ), IFC and BIM model viewing (IFC-3D Browser), weather-delay contingency analysis (Weatherwise Contingency), schedule quality checks (ScheduleScan DCMA), and PDF-to-Microsoft-Project conversion. - Builds and maintains the company website, strategicplanning.nz. - Develops additional custom web applications for individual clients.	
Web Developer, Project Manager CRH Ph / Sence1 Inc. — Philippines	Jan 2023 — Feb 2025
- Led project management, QA, and full-stack development for a Laravel, React, and TypeScript platform connecting homeowners with short-term workers. - Spearheaded a Ruby on Rails, React, and TypeScript initiative letting students and scholarship providers post, manage, and track scholarship opportunities and applications. - Shipped feature enhancements and resolved defects on a Ruby on Rails and React client project.	
Golang Developer Freelance	Aug 2024 — Jan 2025
- Built transaction report generation for a blockchain platform. - Contributed to syncers that process blockchain transactions. - Developed a React and TypeScript web app consuming a blockchain API to support recursive staking.	
Backend Engineer Akaru PH — Philippines	Mar 2022 — Nov 2022
Developed backend services for the Manabie web application using gRPC, microservices, NATS, and Kafka.	

Web Developer, QA

Dec 2021 — May 2022

Clever Harvest — USA (remote)

- Helped build a Traceability App in React Native for tracking olive oil production.
- Performed QA on the companion React web application, verifying data accuracy across the production process.

QA Engineer

Mar 2021 — Dec 2021, May 2022 — May 2023

Yosemitelabs — USA (remote)

- Designed test cases and scenarios from software specifications, covering functional and non-functional requirements.
- Executed test cases, logged and tracked defects, and ran regression testing after code changes to protect existing functionality.

PHP Developer

Jul 2019 — Jan 2021

Coreproc Inc. — Philippines

- Supported and maintained Kaching, a remittance and payment platform.
- Built the frontend, backend, and APIs for MyLoyalty, a loyalty and rewards platform for cafés in Australia.
